

Proposal for Shermar Transportation

Executive Summary

Shermar Transportation is a high growth freight brokerage business needing robust technology to fuel their growth forward that can scale in partnership with their business.

During our discussions and live demonstration conducted for Shermar Transportation, we uncovered your needs and have aligned our PowerBroker and DocumentPower platforms to address these current pain points and system requirements.

McLeod's Fully Integrated PowerBroker & DocumentPower platform addresses your key areas of need by:

Building and Supporting the Best Operation

- ***Move away from manual processes*** through McLeod's digital freight matching tools including ***Top Match, Waterfall Tendering, & PNN***. These not only help you match freight with available carriers, but also to understand where specific carriers want to go and help keep them moving.
- ***PowerBroker//web*** will digitize your operations for team members by giving them access to key dashboards and information on loads through a unique, interactive user interface

Managing the Document Workflow

- ***Ditch the paper*** with McLeod's automated ***eRate confirmation*** and ***DocumentPower*** image management technology that allows you to replace all the paper, faxing, and manual processes. This helps you use less labor, be more accurate, and become more streamlined.

Driving the Best Strategy

- ***Foster a true partnership*** with your carrier base through McLeod's ***Carrier Scorecard*** and ***Certified Partner Integrations***.
- ***Become a trusted advisor*** for your customers through McLeod's ***Rapid Alerts*** and ***Performance Reporting Capabilities***.

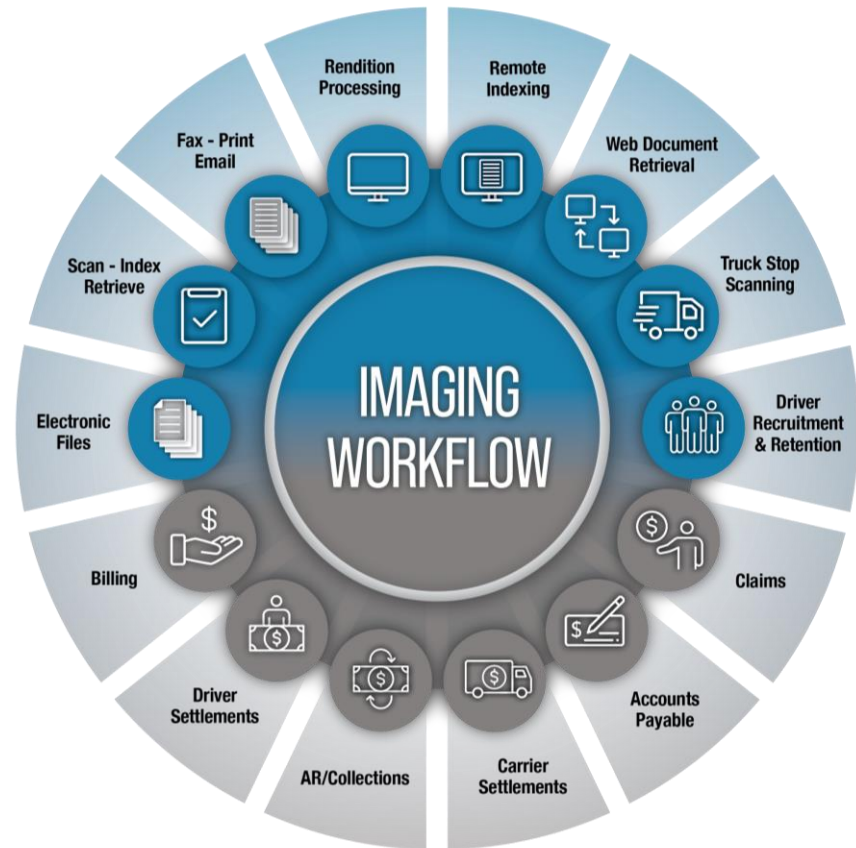

All-In-One Platform

McLeod Software helps drive growth for our customers through automation, optimization, and real time data insights. This allows you to manage your logistics team with one fully-integrated, automated platform

PowerBroker®

DocumentPower®

Shermar Transportation's TurnKey Training Package

Up to Three (3) attendees for Foundational Classroom Training
